Business Entrepreneurship

A group of women learning solar cooker technology

Youth Empowering & Training

Youths in computer training

Broadcasting & Library

A group of community members learning radio programming

Mission Statement

To strengthen community capability by offering improved communication and training efforts. This includes radio broadcasting programmes and training to improve social welfare and use of renewable energy.

Programmes Priority

Business Entrepreneurship

Training includes proper assembly and usage of solar cookers and solar lighting system installation. Expected results will likely generate income, reduce energy costs, and work towards environmental conservation.

Youth Empowering & Training

Establish a training centre, that will focus on intermediate technology, improvements to products and their marketability.

FM Radio Station & Community Library

Establish a Community radio to reach pastoralists and hunter gatherers communities in the Siminjoro District.
